## Lubricant Compatibility Listing

### PRODUCTS AFFECTED:

All ConMet® PreSet® hub assemblies equipped with the SKF SCOTSeal Plus XL, Dana Outrunner or Stemco Endeavor wheel seals.

### SCOPE:

This bulletin provides a list of lubricants that have been tested and found to be compatible with the wheel seals used in ConMet PreSet hub assemblies (see list below). Consolidated Metco does not endorse any of the lubricants listed here. These lists are provided only as a service to show the lubricants that have been tested and found to be compatible with the factory installed seals in ConMet PreSet hub assemblies. ConMet does not recommend nor warrant product lubricated with Grade 2 grease. Any lubricant not found on these lists should be tested and approved prior to use. For seal testing information details, contact SKF at 800-323-8024, Dana Outrunner at 734-354-5334 or Stemco at 903-758-9981.

It is the end users responsibility to ensure that an adequate quantity of clean lubricant is maintained in the hub at all times. Check with TMC or other applicable guidelines for the proper amount of lubricant to be installed and maintained.
